PROFESSIONAL SUMMARY

Detail-oriented Software Test Engineer with 2+ years of experience in Manual Testing and Quality Assurance of web applications. Strong expertise in STLC, SDLC, and defect lifecycle with hands-on experience in Functional, Regression, Integration, and System Testing. Proficient in automation testing using Selenium WebDriver, TestNG, and Maven, with experience in designing and maintaining test automation frameworks (POM). Possess strong programming knowledge in Java along with understanding of web technologies (HTML, CSS, JavaScript) and SQL for backend validation. Currently enhancing skills in API Testing and CI/CD practices, actively seeking opportunities as a QA Engineer / SDET, with additional interest in development-oriented roles.

SKILLS

Programming & Development	: Java, OOPs, JavaScript, HTML, CSS, Basic Spring Boot
Backend & Database	: SQL (MySQL, PostgreSQL), CRUD Operations, Query Optimization (Basic)
Testing & QA	: Manual Testing, Black Box Testing, White Box Testing, Functional Testing, Regression Testing, Integration Testing, System Testing, Smoke & Sanity Testing, UI and Cross Browser Testing
QA Process	: STLC, SDLC, Test Scenarios, Test Strategies, Test Planning, Test Case Design, Test Execution, Defect Life Cycle, Bug Tracking, Requirement Traceability Matrix
Automation & Tools	: Selenium WebDriver, TestNG, Maven, Page Object Model (POM), Data-Driven Testing, Basic Test Automation Framework, Jenkins (Basic CI/CD)
Other Skills	: Generative AI, Prompt Engineering, Agile Methodology, Data Structures (Basics), Debugging
Tools	: Jira, Git, GitHub, Eclipse, VS Code
GIS Skills	: Geospatial Data Processing, GIS Mapping & Validation, Spatial Data Analysis

PROFESSIONAL EXPERIENCE

Associate Software Engineer – Manual Tester | Offket IT Solutions Pvt Ltd **March 2024 – February 2026**

Key Responsibilities

- Designed and executed 200+ functional and regression test cases based on FRS documents to ensure complete test coverage.
- Performed Functional Testing, Regression Testing, Smoke Testing, Sanity Testing, Integration Testing, System Testing, and UI Testing for web applications.
- Conducted Cross-Browser Testing across Chrome, Firefox, and Edge to ensure consistent application behavior.
- Identified, logged, and tracked defects using Jira, managing the complete Defect Life Cycle from reporting to closure.
- Collaborated with developers during defect triage meetings to prioritize high-severity issues and improve bug resolution time.
- Maintained Requirement Traceability Matrix (RTM) ensuring 100% requirement coverage during testing.
- Participated in Agile ceremonies including Sprint Planning, Daily Stand-ups, Sprint Reviews, and Retrospectives.
- Performed re-testing and regression testing after bug fixes to validate application stability before release.

Trainee Associate – Geospatial Services | Avineon India Private Limited **September 2021 – March 2022**

Key Responsibilities

- Processed and validated large geospatial datasets to ensure mapping accuracy and adherence to quality standards.
- Performed spatial data verification and applied corrections to improve geographic data reliability and consistency.
- Conducted quality assurance checks on GIS mapping features to identify and resolve spatial discrepancies.
- Maintained and updated geographic databases to ensure accurate and current spatial representation.
- Collaborated with team members to deliver high-quality geospatial data within project timelines.
- Supported data quality improvement initiatives by identifying errors and recommending corrective actions.

PROJECTS

Project 1: Enterprise Learning Management System (LMS)

July 2025 – December 2025

Project Description: An e-learning platform used for students training, course management, and certification programs.

Key Contributions:

- Verified multi-user workflows for Admins, Instructors, and Students, ensuring seamless navigation and data privacy.
- Performed cross-browser and compatibility testing (Chrome, Safari, Firefox) for SCORM and multimedia content.
- Executed negative testing on the quiz engine to validate timer logic and prevent unauthorized assessment attempts.
- Identified and reported a critical issue where certificates were issued prematurely, preventing a major compliance risk.
- Collaborated with the QA team to track, document, and resolve defects, improving overall system reliability.

Project 2: Patient Care & Scheduling Portal (Healthcare)

June 2024 – February 2025

Project Description: A healthcare management portal used by clinics to manage patient records, appointment scheduling, and billing operations securely.

Key Contributions

- Designed and executed end-to-end test cases for patient registration, appointment scheduling, and billing modules.
- Conducted usability testing on patient onboarding forms to reduce data entry errors and improve user experience.
- Identified and resolved data inconsistencies during data migration, ensuring accuracy of historical patient records.
- Performed functional and regression testing to maintain system stability after updates and enhancements.
- Collaborated with cross-functional teams to ensure timely delivery of high-quality healthcare application features.

Project 3: E-Commerce Web Application (Development + Testing)

Project Description: Developed a full-stack eCommerce web application enabling users to browse products, manage carts, and place orders with a responsive and user-friendly interface.

- Developed a full-stack E-Commerce web application using HTML, CSS, JavaScript, and Java (Spring Boot), improving user engagement by 30% and backend efficiency by 35%.
- Integrated MySQL database for managing users, products, and orders, ensuring 99% data consistency and optimized UI performance to achieve <2 seconds page load time.
- Designed and executed end-to-end test cases for key workflows including login, product search, cart, and checkout to ensure application functionality.
- Automated test scenarios using Selenium WebDriver with TestNG and implemented Page Object Model (POM) framework, improving test execution efficiency and maintainability

EDUCATION

Jawaharlal Nehru Technology University

Masters of Technology in Avionics (Electronics)

November 2021 – December 2023

CGPA: 8.06

Aditya College of Engineering and Technology

Bachelors of Technology in Electronics and Communication

June 2016 – October 2020

CGPA: 7.09

CERTIFICATIONS

Selenium with Java & Frameworks – Udemy – April 2026

Java Programming – Pace Institute – April 2021

Manual Testing - Udemy - June 2024

Certified Java Developer Associate (JDAC-24) – Score: 63% - Jan 2024

ACHIEVEMENTS

- Achieved 100% test coverage by maintaining a well-structured Requirement Traceability Matrix (RTM).
- Reduced post-deployment defects by 15% through implementation of standardized smoke testing procedures.
- Recognized for identifying critical edge-case defects impacting application security and functionality.
